

Claude Campus Ambassadors Application

First name	Yohannes
Last name	Asnake
School name	Other
Are you 18 or older?	Yes
Are you eligible to work in the country where your university is located?	Yes
Are you a full-time student (12+ credit hours) or postdoc?	Yes
Are you an international student (i.e., not a citizen or permanent resident of the country where your university is located)?	No
University email	yohannes.ugr-6285-18@aau.edu.et
Personal email	joe.asn03@gmail.com
Phone number	+251972183015
What's your major?	Computer Science
What's your minor?	Other
Expected graduation semester	Spring
Expected graduation year	2029
Are you planning to study abroad during the 2026–27 school year?	No
How many hours per week can you commit as a campus ambassador?	5–10 hours per week
Upload a copy of your resume	 a7c862d9678c-Yohannes_Asnake_CV_.pdf

What's your current academic level?	Undergraduate student
Were you a Claude Campus Ambassador in the 2025/26 year?	No
What activities and student organizations are you currently involved with on campus?	AAU TECH CLUB
List any leadership positions you hold or have held in those organizations.	member
Tell us about something you helped make happen on campus — an event, a club, a project. What was your role, and what was the result?	One campus experience that stands out was participating in a bootcamp organized by the AAU Tech Club. As a club member, I actively participated in the sessions, worked alongside other students, and gained practical experience while learning from people with different levels of technical knowledge. My role was primarily as a participant and team member rather than an organizer. I contributed during collaborative activities, shared what I knew with other students, and challenged myself to apply the concepts we learned. The experience helped me become more comfortable working in a technical community and showed me the value of learning together rather than working in isolation. The biggest result for me was becoming more engaged with the technology community on campus. It motivated me to keep building projects, explore new technologies, and eventually look for ways to help other students learn and build as well.
Are you currently a formal ambassador, representative, partner, or lead for another company or program on your campus?	No
If you answered 'Yes' above, which?	N/A
Which AI tools do you currently use?	• Claude (app) • Codex • Copilot • ChatGPT • Gemini

Describe one way you use Claude (or AI more broadly) that you think more students should know about.

I use Claude in a way that I believe more students should learn about. Claude serves as a learning partner and problem-solving companion not only a tool that creates answers.

When I learn something especially programming Claude helps me cut hard ideas into smaller pieces. Claude lets me ask questions, about code that I do not understand. Claude pushes me to test my ideas. Claude guides me to think about methods before I write the code myself. For instance while learning backend development with Node.js Claude helps me see what really happens when a request arrives at a server. Claude explains how HTTP streams work. Claude tells me why a certain implementation acts in a way.

I believe students should use AI in this manner because it makes learning interactive. Of simply copying an answer Claude lets you talk with the AI ask "why?" try different options and then create the solution yourself. This method has helped me learn faster while still building my problem-solving skills.

Have you built anything with Claude or the Claude API? If yes, share a link or a short description.*

I have not yet built a project using Claude or the Claude API. As a student, I have mainly worked with other AI APIs that offered free access, since paid API usage is currently difficult for me to afford.

For example, I built an AI Resume Analyzer using React and TypeScript, integrating an LLM API to analyze resumes and provide feedback. Working on that project gave me practical experience with API integration, prompt design, handling model responses, and building AI-powered features into a web application.

I'm interested in building with Claude as well, and becoming a Claude Campus Ambassador would give me an opportunity to learn the platform more deeply and introduce other students to what they can build with it.

What's something you've changed your mind about recently?

Recently I had a change of heart about how students should use AI for learning. At first I believed AI was mostly helpful, for getting answers or helping me finish hard tasks faster. As I started using AI while learning programming I came to understand that the biggest benefit of AI is not giving me the answer but helping me work through a problem. Now I use AI to ask questions test my understanding look at methods and explain ideas from different angles. I still want to solve problems on my o

How did you hear about this program?

Instagram

Which of these Anthropic student programs have you been a part of?

- None of the above

Anything else you'd like us to know?

I'm still early in my journey as a developer, but I'm genuinely excited about what AI can make possible for students. I'm currently studying Computer Science at Addis Ababa University and building projects while learning full-stack development and AI integration. I would especially value the opportunity to introduce students around me to practical ways of using AI for learning, experimentation, and building—not just for getting quick answers. I'm also excited to learn from the Claude community.

By signing this form and submitting an application, you acknowledge that Anthropic will use your information to evaluate your application and run the Claude Campus Ambassadors program, including sharing it with our agency partner, which supports program operations on Anthropic's behalf.
